

Infant crying is normal and it will stop!
Babies start to cry more frequently from around 2 weeks of age.

Comfort methods can sometimes soothe the baby and the crying will stop. Is the baby hungry, tired or in need of a nappy change?

It's ok to walk away if you have checked the baby is safe and the crying is getting to you. After a few minutes when you are feeling calm, go back and check on the baby.

Never, ever shake or hurt a baby.
It can cause lasting brain damage or death.

**Babies Cry,
You Can
Cope**
